DETAILED ACTION

Information Disclosure Statement

1. The references listed in the information disclosure statements submitted on 9/2/03 has been considered by the examiner (see attached PTO-1449).

Claim Rejections - 35 USC ∋ 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims **1-6**, **9**, **12-16**, **18**, **20-22**, **25-28**, **31-32** are rejected under 35 U.S.C. 103(a) as being unpatentable by **Liu** et al (IEEE, "A decorrelating RAKE receiver for CDMA Communication over Frequency-selective Fading Channel", Vol. 47, No. 7, July 1999).

Regarding claim 1, Liu discloses a decorrelating RAKE receiver (see section III, pages 1038 – 1040), comprising

- a plurality of filters comprising a plurality of filter coefficients (see Fig. 1 regarding
 W₁ to W_L blocks, wherein each block would read on a filter as claimed);
- a coefficient generator (see equation (7) on page 1039, wherein it is clear that a coefficient generator would obviously be required in order to generate W_j
 coefficient vectors);

.

Application/Control Number: 10/631,799

Art Unit: 2685

a combiner (see Fig. 1 regarding the coherent combiner).

Therefore, the claimed limitations are made obvious by Liu.

Regarding claim 2, the claim is rejected for the same reason as set forth in claim 1 above, wherein it is clear that Liu would disclose an autocorrelator processor as claimed (see equation (7) on page 1039, and equation (9) on page 1040, note for the autocorrelation function yy and autocovariance matrix Ryy).

Regarding claim 3, the claim is rejected for the same reason as set forth in claim 1 above. In addition, based on the specification regarding the receiver or user identification information. Ci description and equation (1) on page 14, and by comparing the eq. (1) in the specification with the eq. (7) in Liu, it is clear that the a priori information. Ci in Liu would obviously correspond the receiver identification information as claimed (i.e, they both subject to the constraint C.h or C.W = identity matrix I).

Regarding claim 4, the claim is rejected for the same reason as set forth in claim 1 above. In addition, Liu would disclose an inversion processor as claimed (see equations (12) and (13) on page 1040).

Regarding claim 5, Liu would disclose a "receiver identification information" for the same reason as set forth in claim 3 above.

Regarding claim **6**, the claim is rejected for the same reason as set forth in claim 1 above. In addition, Liu teaches a recursive architecture to obtain the filter coefficients Wi (see equation [11] on page 1040).

Art Unit: 2685

Regarding claim **9**, the claim is rejected for the same reason as set forth in claim 1 above. In addition, it would have been obvious to one skilled in the art at the time the invention was made to use a pipeline architecture in Liu, for speeding up the computation of the filter coefficients Wi.

Regarding claim **12**, the claim is rejected for the same reason as set forth in claim 1 above, wherein it is clear that Liu would disclose a wireless device as claimed.

Regarding claims **13-16**, **18**, **20**, the claims are directed to a method and could be interpreted and rejected for the same reason as set forth in claims **1-6**, **9**, **12** above.

Regarding claims 21-22, 25, the claims are directed to a signal processor and could be interpreted and rejected for the same reason as set forth in claims 1-6, 9, 12 above.

Regarding claims **26-28**, **31-32**, the claims are directed to a CDMA spread spectrum system, and could be interpreted and rejected for the same reason as set forth in claims **1-6**, **9**, **12** above.

4. Claims **7-8, 10-11** are rejected under 35 U.S.C. 103(a) as being unpatentable by **Liu** in view of **Wang** et al (IEEE, "Adaptive joint multiuser detection and channel estimation in multipath fading CDMA channels", Wireless Networks 4, 1998, pages 453-470).

Regarding claims **7-8, 10-11, Liu** would discloses all the claimed limitations, see claims 1-6 above, except for a Levinson Durbin algorithm is used to obtain the matrix inverse of the autocorrelation matrix Ryy. However, it is noted that since the use of

Application/Control Number: 10/631,799 Page 5

Art Unit: 2685

Levinson Durbin algorithm for solving matrix inverse is well known in literature as disclosed by **Wang** (see section 6.4 on pages 463-465), it would have been obvious to one skilled in the art at the time the invention was made to incorporate Wang's teaching to Liu for utilizing the Levinson Durbin algorithm in Liu as well, thereby providing predictive calculator as claimed, for utilizing advantages of Levinson Durbin algorithm such as less complexity and operations, and require only O(N) memory locations.

Regarding claims 17, 19, 23-24, 29-30, the claims are interpreted and rejected for the same reason as set forth in claims 7-8, 10-11 above,

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US006404806B1 to Ginesi et al,
US006078573A to Batalama et al,
US005414699A to Lee, and
US 20040095990A1 to Gossett et al.

6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(571) 273-8300 (for **formal** communications intended for entry)

(571)-273-7893 (for informal or **draft** communications).

Hand-delivered responses should be brought to Customer Service Window, Randolph Building, 401 Dulany Street, Alexandria, VA 22314.

Any inquiry concerning this communication or communications from the examiner should be directed to Duc M. Nguyen whose telephone number is (571) 272-7893, Monday-Thursday (9:00 AM - 5:00 PM).

Or to Edward Urban (Supervisor) whose telephone number is (571) 272-7899.

Duc M. Nguyen, P. Examiner.
